

Make a Bug Hotel

Cut the end of a plastic bottle off so that you can fill it with twigs.

You may need to get a grown up to help you with this.

Bugs love hiding in small cracks!

You can make a “BUG HOTEL” to attract those Mini-Beasts!

Simply get an old plastic bottle, tin can, flower pot or any container and fill it with sticks, drinking straws, grass, stones or leaves.

You can decorate your “BUG HOTEL” to look like a bug too!

Leave in your garden and wait to see who comes to visit.
