

Shear Lashing

A shear lashing is used to attach poles to make either an A frame or a tripod.

Tie your rope or string to a pole or stick.

Wrap the rope or string around all of the poles or sticks a few times.

Frap in between the poles to tighten the rope.

Finish with a **knot**

The poles can then be spread out to make a tripod.

Tripods can be used to create a frame for a den for yourself or for a “Forest Pixie” hideout.

Have Fun!

Stay Safe!
